937L Transmission Line Urgent Repair
Notice of application filing and approval

Thank you for your ongoing participation in the 937L Transmission Line Urgent Repair. We submitted an application for the project to the Alberta Utilities Commission (AUC) on June 25, 2026. The AUC approved this project for construction on July 15, 2026.

Next steps

Construction began in April 2026, and the underground repair is expected to start in spring 2027. We anticipate construction to be complete in September 2027.

Depending on where you are in relation to the project, you may see or hear:

- noise and construction crews
- underground transmission line construction
- removal of the temporary bypass transmission line

AUC Approval

When the AUC approves a transmission project, it grants AltaLink Permits and licences. The permits and licences for this project can be viewed on the AUC website at: https://www2.auc.ab.ca/proceeding/30924.

To access the application, scroll down the main page and click on the 'Access here' option under 'Access to the eFiling System' and log in to your eFiling account. If you do not have an account, select 'New personal account' or 'New organization account' and follow the steps on the screen. Please note any questions or concerns regarding account creation and management should be directed towards the AUC at info@auc.ab.ca.

Once your account has been created and you have successfully logged in, enter filing number "30924" into the 'Go to…' search bar on the top of the page to locate the application.

If you have any issues accessing the application, please contact us at the details below and we will mail a copy of the application to you.

Project background

AltaLink is completing urgent repair work to replace the underground portion of its 937L Transmission Line located within Rocky View County, east of Calgary, adjacent to AltaLink's Janet 74S Substation.

To maintain a safe and reliable supply of power, AltaLink installed temporary overhead bypass lines that will remain until the underground portion of 937L can be replaced. Approximately 130 metres of underground cables will be excavated, replaced and reburied as part of this project. All work will take place on AltaLink owned land.

Contact us

We are available to address any questions or concerns you may have. Please contact us at stakeholderrelations@altalink.ca or 1-877-267-1453. Further information about this project and maps are available at https://www.altalink.ca/project/937l-transmission-line-urgent-repair/.

Sincerely,

Kris Gladue
