Chapel Rock to Pincher Creek Area Transmission Development – Project cancellation notification

You are receiving this letter because you are near the Chapel Rock to Pincher Creek Area Transmission Development, and we want to provide you with a project update.

In February 2022, we shared that the timing of the project was flexible to align with generation projects in the area. At that time, we did not anticipate receiving direction from the Alberta Electric System Operator (AESO) to proceed with filing an application for the project until 2023 at the earliest.

Since then, as a result of declining power generation interest and further planning in this region, the AESO has determined that this development is no longer required and has officially cancelled the project.

Information from the AESO is also included with this letter as a reference. If you have questions about the cancellation, please contact the AESO at 1-888-866-2959 or stakeholder.relations@aeso.ca.

We want to thank you for your patience and ongoing participation in the development of this proposed project.

Project background

The proposed Chapel Rock to Pincher Creek Area Transmission Development included:

- A new substation, called Chapel Rock
- A new 240 kV transmission line to connect the new substation to an existing substation
- A connection to the existing Alberta-British Columbia intertie

You may be familiar with a separate project in the area called the Alberta-British Columbia Intertie Restoration Project. This cancellation does not impact the need for that project. The AESO continues to evaluate options to restore the intertie, and more information is expected in 2026.

Contact us

We are available to address any questions or concerns you may have. Please contact us at stakeholderrelations@altalink.ca or 1-877-267-1453. You can also view more information about the project at www.altalink.ca/chapelrock.

Sincerely,

Kris Gladue
