Edmonton Carbon Capture Utilization and Storage (CCUS) Gas Connection
Project cancellation notification

Thank you for your participation in the Edmonton Carbon Capture Utilization and Storage (CCUS) Gas Connection. In December 2024, AltaLink began consulting with stakeholders on the proposed project.

We want to inform you that on September 11, 2026, Heidelberg Materials Canada Ltd (Heidelberg) requested to cancel their system access service request with the Alberta Electric System Operator (AESO). As a result, AltaLink's related project is no longer required.

If you have questions about Heidelberg's project, please contact Brent Korobanik at 780-420-2500 or EdmontonCCUSinfo@heidelbergmaterials.com.

Information from the AESO about the cancellation is included with this letter. If you have questions about the cancelled request for system access service, please contact the AESO at 1-888-866-2959 or stakeholder.relations@aeso.ca.

Project background

To connect the Edmonton Carbon Capture Utilization and Storage (CCUS) Gas Connection to the grid, AltaLink had proposed to:

- modify its 747L transmission line by disconnecting it from EPCOR's 711L transmission line and building approximately 250 metres of new transmission line to connect it to the 37S North Calder Substation
- modify the existing 37S North Calder Substation by adding one new 138 kilovolt (kV) circuit breaker

Contact us

We are available to address any questions or concerns you may have. Please contact us at stakeholderrelations@altalink.ca or 1-877-267-1453. You can also view more information about the project at http://www.altalink.ca/projects.

Sincerely,

Kris Gladue

Manager, Stakeholder Engagement
